

### Post-doctoral fellow position posting

I am looking for post-doctoral fellow to work on a project investigating the cellular and molecular mechanisms of sex differences and the effect of puberty on immunity in the murine model of multiple sclerosis. Candidates will have expertise in immunology or neuroimmunology and experience with murine models.

The candidate should have strong expertise in flow cytometry, be highly motivated, creative, and capable of working independently. The candidate will be expected to drive a number of projects in parallel, analyze data, and help write manuscripts. The candidate will also work closely with others in the Dunn lab working on human immunology projects with a parallel focus.

Interested candidates should send a cover letter, CV and names/contact details of two references to Shannon Dunn at [Shannon.Dunn@unityhealth.to](mailto:Shannon.Dunn@unityhealth.to).
